

Gaia-FUN-SSO Circular #2

Dear Gaia-FUN-SSO member,

As announced before, we propose to perform new training astrometry campaigns. The PHA 99942 Apophis is coming back and is now observable for several months. We propose this target for the first campaign in the period 9/12 - 1/3. The conditions will not be so good for the beginning of the period but you will be able generally to find some possible time slots for observations. The wiki pages (at <https://www.imcce.fr/gaia-fun-sso/>) have been updated and you will find in particular topocentric ephemerides for preparing some runs in your observing site depending on the local conditions that you will read in them. As usual, some recommendations are given in the wiki and we stay available to answer to some questions if needed. We would appreciate that you send us your astrometry measurements at gaia-fun-sso@imcce.fr (by specifying whether you also sent them to MPC or you let us do that).

With our best regards
W. Thuillot
for the Gaia-FUN-SSO central node
